# Pegasus

## Double sided sign bollard

Ideal for information display on highways  
our car parks.

### Application

Sign display on roads, parks, paths and car parks.

### Large double-sided signage options

With 305mm x 255mm signage capacity either side, the Pegasus is perfect for displaying disabled badge holder signs (661A) or enforcing other parking restrictions.

**Typical Sign Face Options:** Disabled Badge Holder; No Parking; Staff Parking; Entrance; Exit. Please talk to us about your requirements, as we can put literally anything on the sign (within reason, of course).

### Safety

The Pegasus is available as either standard, or with a steel core or as a reboundable bollard. For high-risk traffic calming applications we recommend our reboundable variant. Our rebound material bollard has been tested to BS EN 12767:2019 and will deliver significant cost-savings due to its ability to rebound on impact.

### Long life

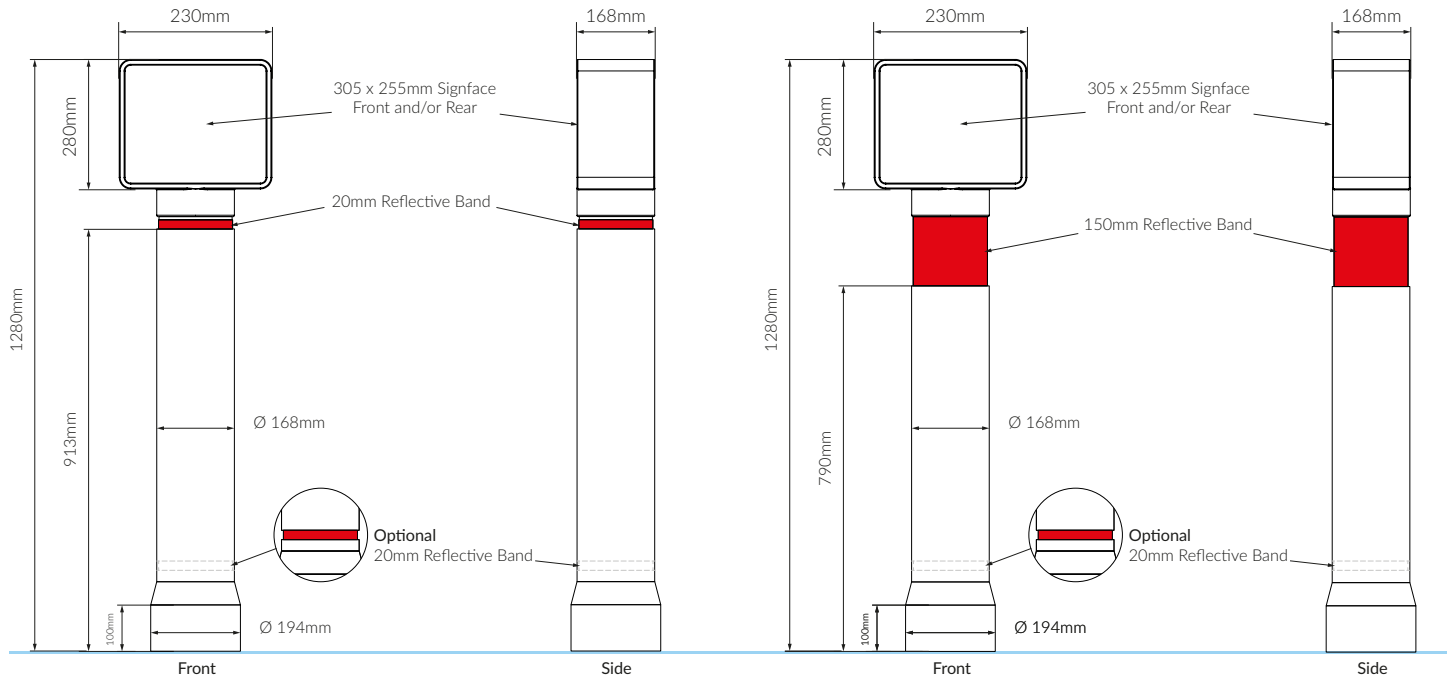

Our bollards are built to last. They're abrasion and chip resistant, as well as being resistant to salt spray and uric acid. Plus at the end of their lives, our bollards are recyclable.

### Compatibility

The whole of our street furniture bollard range has been designed with the option of our innovative LockSafe® system. This means our LockSafe® roots are directly compatible with industry standard sockets already in the ground. We have options for both round and square ground sockets.

**LockSAFE®**

# Specifications

20mm narrow band

150mm wide band  
(DDA compliant)

## Standard Material:

Rotationally moulded using an advanced polyethylene, our standard bollards are durable, ultraviolet light resistant and have great low-temperature impact resistance.

## Rebound Material:

Our rebound bollards are rotationally moulded using a specially formulated type of low density polyethylene (LDPE). This makes our bollards flexible on impact, resistant to UV light and very durable.

Passively Safe to BS EN 12767:2019 - 100-NE-A-R-NS-MD-0  
70-NE-A-R-NS-MD-0  
50-NE-A-R-NS-MD-0

BS EN 12767:2007 - 100:NE:4

# Foundations

**Bolt Down**  
Standard and Reboundable  
(Surface Mounted)  
(Flange Fixed)

**Steel-Core**  
Secure 1320 x 114 x 5mm mild steel insert

**Concrete-in Root**  
Standard and Reboundable  
(Same root as LockSafe-SQ but without the mechanism)

**LockSAFE-SQ Root**  
Standard and Reboundable

**TMP Socket**  
(For LockSafe-SQ root bollards)

**LockSAFE-R Root**  
Standard and Reboundable

**Retrofit - Glasdon LockFast™ Socket**  
("Square" Socket)

**Retrofit - Glasdon Ground Socket**  
("Round" Socket)

Our bollards can be installed in a 400mm wide by 400mm deep excavation using quick-setting concrete, e.g. Grade QC10, but the exact installation requirements should be assessed by a site survey. We recommend our LockSafe® socket is bedded on gravel to help drainage and alignment.

We operate a policy of continuous product development and reserve the right to change or improve specification without prior notice. E & OE.
