Countdown

Retro-reflective self-righting marker
High visibility junction marker set

PassiveSAFE[®]

Rebounds on impact and fully
compliant to BS EN 12767:2019

Essential passively safe highway signage

A non-illuminated and passively safe set of hazard markers designed and real world tested to be fully compliant for use on the UK highways. They are available in sets of three with the appropriate markings for near side and off side carriageways.

- Ready assembled
- Easy to install
- 100% Recyclable
- BS 8442:2015 compliant
- All reflective material meets BS 8408:2005

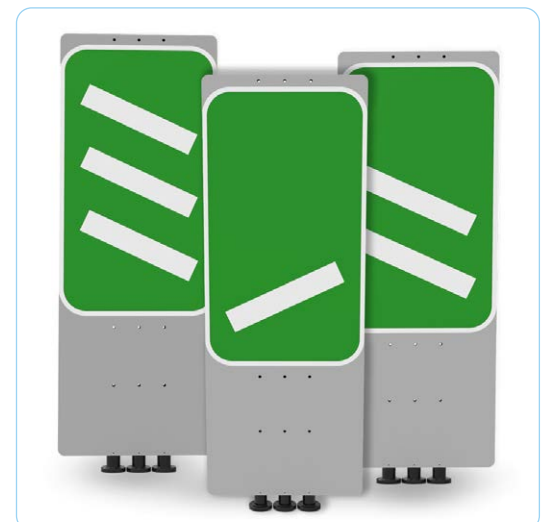

These instantly recognisable green countdown markers are great for warning traffic of an upcoming junction and how far away it is.

There are two options with three blades in each set:

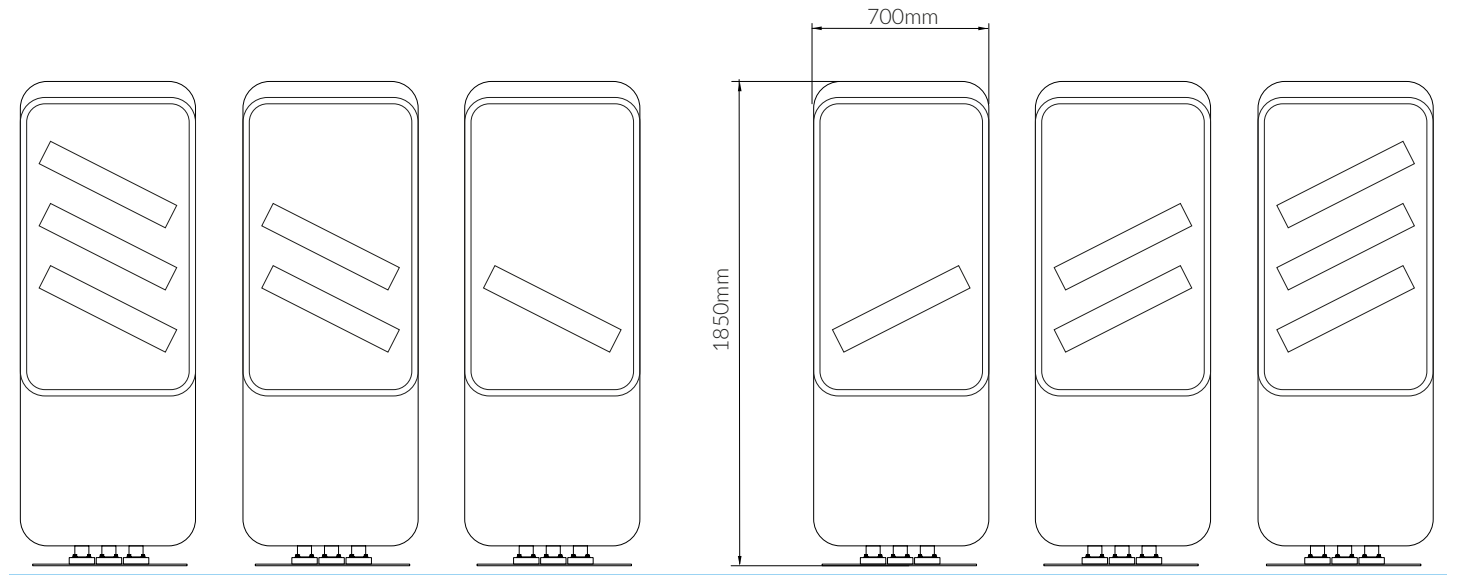

Offside - for the central reserve.

Nearside -for the verge.

These effective markers are made of durable polypropylene and the blades are passively safe incorporating the unique TMP base system. The Countdown marker will yield on impact and rebound back afterwards, reducing the amount of damage that may occur to the driver, vehicle and marker.

Specifications

Verge (N/S)

Central Reserve (O/S)

Base options

Mounted on a unique base system to support the multiple post assembly the signs are simply attached to the supporting cast-in cage system at the time of installation.
