# Speed Bump

50mm Speed Bump (Chequered)

Ideal for calming traffic especially around vulnerable road users such as near schools, residential areas, or car parks where traffic needs to be slowed down for safety.

This SPEED BUMP section is 500mm wide x 50mm high.

- Made from a tough recycled thermoplastic material
- Bolt down holes for 12mm bolts
- A chequered pattern for extra grip
- End cap sections and fixings available separately

The SPEED BUMP END CAPS come in pairs.

- Made from a tough recycled thermoplastic material
- Bolt down holes for easy installation
- A chequered pattern for extra grip

## Installation

The speed bump sections have bolt down holes in them for the use of coach bolts, making installation very quick and easy into concrete or tarmac. Suitable fixings can be brought separately, a set containing eight fixings is needed per metre of section. The end caps can be bolted down into concrete or tarmac with coach bolts.

# Specifications

## Speed Bump Section

This speed bump section is 500mm wide. When the end caps are brought separately and adjoin these sections they make fully functioning speed bumps.

These tough sections are made from 50mm high recycled thermoplastic with a chequered pattern to give extra grip. Making them ideal for placing near schools, residential areas or car parks where traffic needs to be slowed down for everyone's safety.

<b>Conformity</b>	Conforms to the requirements of BSEN13422 Production is carried out in accordance with ISO 9001:2015 Quality System
<b>Colour</b>	Solid black or high visibility painted yellow
<b>Materials</b>	100% recycled Thermoplastic material
<b>Extras</b>	Coach Screws (12 x 75mm) Nylon Plugs (14 x 75mm)
<b>Height</b>	50mm
<b>Length</b>	500mm
<b>Width</b>	420mm
<b>Weight</b>	8kg approx.
<b>Channel</b>	40mm x 20mm

**Note:** The exact colour/tone may vary batch to batch.

## Speed Bump End Caps

The speed bump end caps are sold in pairs and are placed at either end of the speed bump sections to leave a smooth finish and form a fully functioning speed bump. They are made from 50mm high recycled thermoplastic which is very tough with enhanced grip from the chequered pattern design.

The end caps play a vital role in smoothing off the ends of the speed bump so as not to tear tyres apart from when hitting sharp edges. Once the speed bump is fully formed it can calm traffic; important in areas such as schools where vulnerable pedestrians would benefit from slow traffic.

## Instructions

The product meets all the requirements as laid out and used to the requirements of The Traffic Signs Regulations and General Directions 2002 and The Safety at Street Works and Road Works. Maximum weight capacity is 40,000 kg.

<b>Conformity</b>	Conforms to the requirements of BSEN13422 Production is carried out in accordance with ISO 9001:2015 Quality System
